Don Forrest Usbal

Software Engineer

Technology enthusiast. Conversant in English. As a programmer, I write efficient, maintainable, and reusable code. Partake in Extreme Programming principles like daily stand-ups, code refactoring, and pair programming. Experienced working in Agile development environments. Well-versed in Test Driven Development. Proficient with the three pillars of frontend development. I utilize the best software development tools such as Git, Github, Jira, and Postman. In my latest projects, I used React JS and Firebase.
